 COUNTRIES WE SUPPLY

CSS (Connecticut Spring & Stamping) has strategic business alliances with ISO 9001, ISO 13485, ITAF16949 certified Asian manufacturers. We supply all types of springs, wire forms and metal stampings from this lower cost manufacturing region. Parts can be shipped direct within Asia or to other regions worldwide.

To ensure your continuity of supply, all parts are guaranteed to meet the quality, delivery and cost requirements of our customers regardless of manufacturing location. If any problem arises in Asia or in transit, our USA facility steps in and meets the customer needs seamlessly.

All your customer service and technical needs, including purchase order placement, scheduling, part qualifications, certifications and other quality issues are handled from our Connecticut facilities by our AS9100D & ISO 9001:2015 and ISO 13485:2016 certified staff.
